Sequence 11, Application US/08523894

Factor No. 613510.

BERIERAL INFORMATION:

APPLICANT: Hanna, Nabil

APPLICANT: Reff, Mitchell E.

TITLE OF INVENTION: Recombinant Anti-CD4 Antibodies for Human

TITLE OF INVENTION: Therapy

UNMBER OF SEQUENCES: 59

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                              1 ATGAAACACCTGTGGTTCTT.......CCCTGTCTCCGGGTAAATGA 1431

-I- ALTERNATIVE PRODUCTS: CELL LINES PRODUCING IGG CONTAIN TWO MRNA SPECIES FOR IG GAMMA CHAINS. THE MAJOR SPECIES ENCODES SECRETED GAMMA CHAINS. THE MAJOR SPECIES ENCODES MEMBRANE-BOUND CHAINS IN THAT IT CONTAINS AN ALTERNATIVE 3' END. ENCODED IN SEGMENT OF MU CHAINS: THAT IS HOMOLOGGUS WITH THE MEMBRANE-BOUND SEGMENT OF MU CHAINS.

"Nucleotide sequences of gene segments encoding membrane domains of immunoglobulin gamma chains.";

Proc. Natl. Acad. Sci. U.S.A. 79:2623-2627(1982).

-!- ALTERNATIVE PRODUCTS: CELL LINES PRODUCING IGG CONTAIN TWO MRNA SPECIES FOR IG GAMMA CHAINS. THE MAJOR SPECIES ENCODES SECRETED GAMMA CHAINS. A LESS ABUNDANT SPECIES APPEARS TO ENCODE MEMBRANE-BOUND CHAINS IN THAT IT CONTAINS AN ALTERNATIVE 3' END, ENCODED IN SEGMENT OF MU CHAINS. THAT IS HOMOLOGOUS WITH THE MEMBRANE-BOUND SEGMENT OF MU CHAINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Query Match

This substance is especially an antibody with affinity towards HCV BZ/NS1 protein, containing amino acid sequences based on the complementarity determining region (CDR) 1, CDR2 and CDR3 of the H and L chain variable regions. The antibody inhibits the viral envelope glycoprotein. It is also a CD81 inhibitor. The antibodies and drugs are used for treatment and/or prevention of hepatitis C, or for diagnosis of hepatitis C.
                                                                                               420
                                                                                                                            411
